

Response Message for a Passar Import Declaration CH (PassarImportResponse)

This BOX object is used to forward a response for a Passar Import declaration CH.

The response can refer to different transmissions. The reference is declared in the <TypeOfResponse> element as follows:

- NI028: Response Import declaration
- NI004: Response Import declaration amendment
- NI096: Response Correction of a goods declaration Import
- NI009: Response Import declaration withdrawal
- NC909: Technical error message

A note on the difference between a PassarImportResponse with the status ACCEPTED and the PassarImportAcceptance:

- the PassarImportResponse is issued before the BAZG's plausibility check ("Wahrscheinlichkeitprüfung")
- the PassarImportAcceptance is issued after the plausibility check ("Wahrscheinlichkeitprüfung")

Note regarding <TypeOfResponse> NC909 "Technical error message":
These "technical errors" have nothing to do with the XML file you sent to the GE-BOX. Rather, they relate to the transmission from DAKOSY to Swiss Customs. In a perfect world, you would never receive a "technical error" notification. As long as your company is correctly configured in ZODIAK GE and all rules, conditions and code lists match between Swiss Customs and ZODIAK GE, you will not encounter such errors. However, errors do occur, and we pass this information on to you via this sequence. Generally, you will not be able to resolve these "technical errors" yourself, as the root cause usually does not lie in the data you sent to the GE-BOX. Please contact our support team regarding "technical errors".
