

supplementary export declaration (EE, ErgaenzendeAusfuhrAnmeldung)

The message is used by the participant to transmit the supplementary/replacement declaration for export. It completes and, if necessary, partially replaces the incomplete export declaration.

The supplementary/replacement declaration refers to the data of the incomplete declaration at the time of "release for export" and must not take into account any subsequent changes (lower quantities at the exit, cancellation of remaining quantities).

If information that has already been provided from the incomplete export declaration is retransmitted (and possibly changed), the information from the " supplementary export declaration" message replaces the original information from the "release for export" message.

All information in this document is purely informative and does not constitute instructions or templates for submitting customs declarations.
The declarant is solely responsible for the content of a customs declaration. All information is provided without warranty.
