

export declaration (EG, Ausfuhranmeldung)

This BOX object creates a declaration for export in the export procedure.

A cancellation of the Export declaration in ZODIAK is possible with this message via the object action (OB0050) "CANCEL" as long as the registration has not yet been accepted by ATLAS. The additional specification of the object action "SEND" is not permitted, since the cancellation does not have to be sent to ATLAS. If ATLAS has already accepted the "registration for export", an "application for cancellation of the export" can be sent to ATLAS via the object EC.

The field "Type of export declaration (EG1025, ExportDeclarationType)" must indicate the type of export declaration. This field consists of the following eight digits to be considered individually [Source: ATLAS - Info 0306/22 from 03/22/2022]:
1. Declaration submission date and time (0=advance, 1=subsequent, 2=consolidated).
2. Reason (0=none, 1=correction, 2=emergency procedure, 3=carnet ATA)
3. Type of outward processing (0=none, 1=customs, 2=economic)
4. Type of outward processing authorisation (0=none, 1=OPO-PV, 2=application for simplified authorisation)
5. Type of authorised simplification (0=none, 1=SDE)
6. Location of presentation (0=none, 1=customs office of export, 2=according to article 12(4) of the Foreign Trade and Payments Regulations [AWV], 3=SDE authorisation, 4=CCL authorisation, 9=exit customs office)
7. Scope of declaration (simplified) (0=standard export declaration, 1=simplified export declaration)
8. Special case (0=none, 1=low value, 2=justified)

Example: the entry "00001300" stands for a standard export declaration for the two-stage simplified procedure using an SDE export permit (formerly known as AM+e).
