

Reminder for supplementary/replacement declaration (EM, AnmahnungErgaenzendeAusfuhranmeldung)

With this BOX object, the reminder of a supplementary/replacement declaration for export that was not made in due time is forwarded to you by the ATLAS customs system.

In order to have this BOX object reported, the following must be observed when configuring the event in ZODIAK GE.

- If there is an "Export declaration (EXD)" in ZODIAK GE for the affected MRN, the reminder is always assigned to this process. Even if there is a "Supplementary Export Declaration (EXEE)" in ZODIAK GE for the MRN.
- In order to receive reminders for the "Export declaration (EXD)" created by your system via the GE-BOX, it is sufficient to configure the E_EXP_URG with IFBOX in the "Event Configuration" for EXD.
- If, on the other hand, your system only creates the "Supplementary export declaration (EXEE)" via the GE-BOX, you must configure the E_EXP_URG with ALWAYS in the "Event Configuration" at EXD in order to also have the reminders reported to your system, for which an "Export Declaration (EXD)" is available in ZODIAK GE.
- In order to also receive the reminders for MRN for which there is no "Export declaration (EXD)" in ZODIAK GE, you must configure the E_EXP_URG with ALWAYS in the "Event Configuration" at EXEE.

You can use the ZODIAK reference number communicated in attribute OB0020 rsp. element ObjektIdentifizierung/ObjektName or the Master Reference Number (MRN) communicated in attribute EM0100 rsp. the ExportOperation/MRN element to create an assignment to the process in your system.

In attribute EM0120 rsp. element ExportOperation/LimitForResponseDate, you are informed of the deadline for the transmission of the supplementary/replacing declaration for export to the customs office of export.

Failure to submit a supplementary/replacement application may result in administrative offense proceedings being instituted against the applicant for late or omitted submission.
