

# WKS Confirmation of Prelodged ASumA (EXSCON, ConfirmationPrelodgedExitSumDecWKSDE)

This BOX object confirms a Prelodged Exit Summary Declaration in the WKS procedure.

The Confirmation of Prelodged ASumA is a message from a participant to the customs administration.

When creating a prelodged ASumA (ExitSummaryDeclarationWKSDE with PreLodgedDeclaration = “J”), the procedure transferences (GoodsItem/ProcedureTransference) can be specified for individual (or all) goods items. This is optional. When confirming a prelodged ASumA, the procedure transferences for individual (and all) goods items can then be changed, added and also deleted. Proceed as follows via the BOX interface.

For all goods items for which you want to change, add or delete the procedure transferences, specify an occurrence of the sequence GoodsItem in which you name the respective goods item in the DeclarationGoodsItemNumber element. The BOX will first delete the procedure transference stored in ZODIAK-GE (if existing from the creation of the prelodged ASumA) as well as the “previous document” field for each goods item named in this way. A new procedure transference for the goods item can now be recorded via GoodsItem/PreviousDocument/Type and the sequence GoodsItem/ProcedureTransference. The procedure transference is then changed or added. If you do not provide any information about the previous document and the procedure transference, you have deleted the procedure transference.

All goods items that you do not name in the ConfirmationPrelodgedExitSumDecWKSDE remain unchanged. Any procedure transference saved from the creation of the prelodged ASumA in ZODIAK-GE is therefore retained for the unnamed goods items.

Two simple examples:

- If you send a ConfirmationPrelodgedExitSumDecWKSDE and specify all goods items, the procedure transferences and the information on the previous document for all goods items will be changed/added (if GoodsItem/PreviousDocument/Type and GoodsItem/ProcedureTransference are specified) or deleted.
- If you send a ConfirmationPrelodgedExitSumDecWKSDE and do not specify any goods positions, all information on procedure transferences and previous documents from the ExitSummaryDeclarationWKSDE will be retained.

In principle, a plausibility check is carried out before transmission to ATLAS (SEND action). Goods items with previous document N337 must have a valid procedure transference in order to be able to be sent.
