

# WKS Exit Notification for ASumA (EXSNOT, ExitNotificationExitSumDecWKSDE)

With this BOX object, the physical exit of the goods declared in the referenced WKS/ASumA can be notified to their actual extent after they have been moved out of the customs territory of the Union.

The BOX object can be sent multiple times (unless the Finalization field has already been reported as “Yes”). With a new transmission, only the exit of further packages to the referenced WKS/ASumA can be notified. The notification for individual packages cannot be reversed.

The data contained in the ProcedureTransference sequence must be compatible in terms of content and numbers with the data registered in the WKS/ASumA and with the data that has already been notified at the exit. By sending this BOX object, no change to the originally registered ProcedureTransference is possible. Only the exit of a smaller number of items can be notified.

All information in this document is purely informative and does not constitute instructions or templates for submitting customs declarations.
