

answer to status query (EX, AntwortStatusanfrageAusfuhrAnmeldung)

This BOX object serves as a possible answer to a status query from the customs office of export regarding the whereabouts of the goods from an export process (BOX object: EF - question about status).

As an alternative to this message, the BOX object EC „application for cancellation of export“ can also be used as a response to the status query.

The reference number of the export declaration for which the status request is to be answered must always be given as the reference number (OB0020). This message then answers the status request in the existing export declaration. "CHANGE" must therefore always be used as the action (OB0050).

All information in this document is purely informative and does not constitute instructions or templates for submitting customs declarations.
