

General event (GE, GenerellesEreignis)

The declaration passes through several technical transitions between transmission to ATLAS (action "SEND") and the receipt of the first technical ATLAS feedback. The passing of a declaration is referred to here as an event (OB0200) and can be error-free ("*OKAY") or error-free with warnings ("*WARNING") or the transfer can be terminated at a transition with an error (*ERROR). The transitions are referred to here as reporting points (OB0210).

The individual reporting points can be found in the flow chart in the following figure.
