

IMPOST acknowledgment (IMPOSTacknowledge)

With the COMACK response, ATLAS communicates acknowledgments on an IMPOST customs declaration. These acknowledgments can be passed on to your system by the GE-BOX with the XML reply <IMPOSTacknowledge>.

For an IMPOST customs declaration, ATLAS can make several acknowledgments one after the other. An XML acknowledgments <IMPOSTacknowledge> is sent to your system for each individual acknowledgment.

ATLAS may use this feedback to communicate decisions on early and final/confirmed IMPOST registrations. Information is provided about the acceptance (AcceptanceFlag) or, in the case of early registrations, about the planned procedure (DecisionFlag) as well as about orders (DirectiveFlag) and cancellations (CancellationFlag).

All information in this document is purely informative and does not constitute instructions or templates for submitting customs declarations.
The declarant is solely responsible for the content of a customs declaration. All information is provided without warranty.
