

WKS Re-Export Notification (EXSDAT, ReExportNotificationWKSDE)

This BOX object creates a Re-Export Notification in the WKS procedure.

The Re-Export Notification is a message from a participant to the customs administration.

If an economic operator is obliged to submit a Re-Export Notification and the customs office of exit is in Germany, he or she satisfies this obligation by transmitting the message to the ATLAS customs system.

The message must be transmitted to the customs office of exit by the declarant or a transmission service provider commissioned by the declarant; i.e. the professional transmitter (notifier) and technical transmitter (sender) of the message do not have to be identical.

All information in this document is purely informative and does not constitute instructions or templates for submitting customs declarations.
The declarant is solely responsible for the content of a customs declaration. All information is provided without warranty.
