

re-export/consignment (VV-REX, SumAWiederausfuhr)

This BOX object is used to transmit messages for re-export or. The regulations for re-export or the implementation of a transit procedure remain unaffected. Based on the transmitted actual loading status, only the IT-supported completion of the relevant items in the SumA processes takes place.

With "**CREATE**" a new re-export/consignment can be created in ZODIAK. A previously unused reference number must be specified in the FlatFile attribute OB0020 or in the XML element ObjektName.

With "**REPLACE**" an existing process in ZODIAK can be completely replaced by a re-export/consignment. The reference number of the process to be replaced must be specified in the flat file attribute OB0020 or in the XML element ObjektName name. A process can no longer be replaced if it has already been registered with ATLAS.

With "**CHANGE**" the re-export/consignment can be applied to a process that exists in ZODIAK and is registered by ATLAS. The reference number of the process to be changed must be specified in the flat file attribute OB0020 or in the XML element ObjektName.

With the additional specification of the "**SEND**" action, an automatic transmission of the re-export/shipment created in ZODIAK to ATLAS can be requested. This action is only carried out if the certified plausibility checks in ZODIAK do not identify any plausibility violations. The BOX receipt (BQ) generated for each transaction sent to the ZODIAK-BOX provides information about the result of this check and about the successful and unsuccessful actions.
