

incoming goods (WE, Wareneingang)

The BOX object WE is used to register goods for the customs warehouse, regardless of the type of declaration. Depending on the type of registration, only parts of the attributes are to be transmitted.
Reference can be made to standardized "templates / master copy" documents by specifying the document number in attribute OB0040.

Special feature of the supplier master: A master record is created if master information is also entered in the attributes WE4000 - WE4290 for the supplier number and it is a new supplier. If a supplier already exists, the entries in the attributes WE4000 - WE4290 are not taken into account and the values are taken from the existing master.

Special feature article and customs tariff master: A master record is created if master information is also entered in the attributes WE8400 - WE9220 for the article/tariff master and new article/tariff numbers are involved. If master records already exist, the entries in the attributes WE8400 - WE9220 are not taken into account and the values are taken from the existing master records.

All information in this document is purely informative and does not constitute instructions or templates for submitting customs declarations.
The declarant is solely responsible for the content of a customs declaration. All information is provided without warranty.
