

presentation at exit (XP, PresentationEXITDE)

The message is used by the carrier to initiate the presentation of goods in an export transaction at the customs office of exit.

In the two-stage process, the export is identified by specifying the MRN.

In the one- stage process, the export is identified by specifying the LRN, which is the reference of the export. If the export was registered under a different EORI / Subsidiary number than the preannouncement of exit, the EORI / Subsidiary number of the declarant of the export process must be given for identification via an LRN, unless the export was reported via a representative. If the declaration of the export was made via a representative, the EORI / Subsidiary number of the representative must be given.

All information in this document is purely informative and does not constitute instructions or templates for submitting customs declarations.
The declarant is solely responsible for the content of a customs declaration. All information is provided without warranty.
